Gender Neutral Restroom

What is a *gender neutral restroom*?

- ✓ A gender neutral restroom, also known as a unisex restroom is one that can be used by all genders. This would be similar to a bathroom found in a private home or bathrooms found in modes of public transportation.
- ✓ Using a gender neutral restroom can allow a transgender individual to feel comfortable and safe.
- ✓ Gender neutral restrooms are more friendly for both users and the helpers of those who need aid using a bathroom. Including disabled persons, elderly, and children.
- ✓ Gender neutral restrooms allow for flexibility when there may be an influx of one gender needing the restroom, creating a long line. It opens up the possibility for more available toilet stalls.
- ✓ Pictures of the toilet style are posted on the doors so that each individual can recognize and choose the toilet they feel comfortable with. Each toilet stall including urinals will have a door, providing privacy for the user.
